Practice Areas

Cloud Migration & Modernization

- Discovery, assessment, and business-case development (the 6 R's: rehost, replatform, refactor, repurchase, retire, retain).
- AWS, Azure, and GCP landing zones, well-architected reviews, and phased migration execution.
- Application rationalization, dependency mapping, and migration wave planning.

Managed Services (MSP)

- 24x7x365 NOC with tiered support, dedicated account manager, and severity-based escalation.
- Performance & uptime SLAs (99.95% standard), proactive monitoring, and patch management.
- Backup, disaster recovery, and business-continuity operations.

ERP Modernization & Implementation

- Cloud COTS ERP selection and implementation (NetSuite, Sage Intacct, Workday Financials).
- Finance, procurement, grants/fund accounting, HR/payroll, and travel/expense modules.
- Integrations with banking (ACH/e-payments), payroll, HRIS, and fundraising platforms.

Security & Identity

- Identity & Access Management (IAM) strategy and implementation (Okta, Entra ID, Ping).
- Zero Trust Network Access (ZTNA) and Secure Access Service Edge (SASE) strategy.

- Security assessments aligned to SOC 2, NIST 800-53, and HIPAA Security Rule.

Differentiators

- 100% onshore delivery — suitable for engagements that prohibit offshore data access.
- SOC 2 Type II and ISO/IEC 27001 certified operations.
- Experience across regulated industries: public retirement systems, healthcare-adjacent, and nonprofit fund accounting.
